 **Home:** Saulėtekio al. 11, Vilnius Vilniaus m. sav., LT-10223 Vilnius (Lithuania)

### ABOUT ME

Accomplished Principal Engineer with 12+ years of progressive experience in full-stack software development, systems architecture, and engineering team leadership across multinational organisations, including Wipro, IBM, Sonata Software, and Theorem Inc. Proven track record of designing and delivering scalable, high-performance web applications that directly drive business outcomes, with demonstrated achievements of 25–40% operational efficiency improvements across multiple projects.

Core competencies span **full-stack architecture, cloud DevOps (Docker / Kubernetes / Azure), data pipeline design, agile team leadership, client and stakeholder management, and AI-assisted development using tools such as GitHub Copilot and Cursor.**

Currently undertaking a purposeful transition into AI Engineering, with enrolment confirmed for the **Master's in Engineering of Artificial Intelligence at VILNIUS TECH (VGTU)**, Lithuania, commencing September 2026. This career evolution builds directly on an established foundation in data management, system optimisation, and algorithmic problem-solving to engage deeply with machine learning, intelligent system design, and AI-powered application development.

### EDUCATION AND TRAINING

#### Master of Engineering in Artificial Intelligence

**Vilnius Gediminas Technical University (VGTU)** [ 01/09/2026 ]

City: Vilnius | Country: Lithuania | Level in EQF: EQF level 7

Admitted and commencing studies in September 2026.

Machine Learning, Deep Learning, Generative AI, Computer Vision, Natural Language Processing, Explainable AI, Distributed Systems, Big Data Analytics, IoT, Optimization Algorithms, AI Project Management, Research Methods, and Intelligent System Development.

#### Bachelor of Engineering in Computer Science

**Visvesvaraya Technological University (VTU)** [ 13/06/2009 – 14/06/2013 ]

City: Karnataka | Country: India | Level in EQF: EQF level 6

Programming (C, C++, Java), Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Computer Architecture, Information Security, Object-Oriented Design, Project Development, Problem Solving and Analytical Skills.

### WORK EXPERIENCE

 **Wipro (Formerly Harman Connected Services Corp. India Pvt. Ltd)** – Bengaluru, India

## Principal Engineer

[ 10/10/2024 – Current ]

**Industry: Healthcare IT | Contract type: Permanent, Full-time**

- Led a cross-functional engineering team to deliver enterprise-scale clinical data management applications using Agile/Scrum methodologies.
- Architected and developed full-stack solutions using **React, Redux Toolkit, Node.js, and MySQL** for the **BIOS Adam Designer**, a clinical trial data management and business rules engine.
- Designed and implemented a **Micro-Frontend architecture** using **Webpack Module Federation**, enabling independent deployments and parallel team development.
- Collaborated directly with US and European clients to translate business requirements into scalable technical solutions and consistently deliver high-quality releases.
- Conducted code reviews, mentored developers, and drove engineering best practices, sprint planning, and technical design discussions.
- Improved clinical trial data accuracy by **~35%** through an automated data validation layer and business rule execution pipeline.
- Leveraged **Cursor, Claude, and GitHub Copilot** to accelerate development, improve code quality, and increase team productivity.
- Contributed to CI/CD, release management, and application performance improvements to ensure reliable production deployments.

 **IBM India Private Limited** – Bengaluru, India

## Senior System Analyst

[ 09/09/2021 – 07/10/2024 ]

**Industry: Energy & Utilities | Contract type: Permanent, Full-time**

- Contributed to the **Open Balancing Platform**, an automated energy supply optimization system using **React (Micro-Frontend Architecture), Redux Toolkit, Node.js, GraphQL, TypeScript, Material UI, and REST APIs**, enabling real-time demand and supply balancing across energy grids.
- Built and maintained the **IFRS 17 Data Platform** using **React, Redux, Node.js, TypeScript, Kafka, Microservices, and REST APIs**, developing real-time data streaming, routing services, and scalable data processing solutions for insurance applications.
- Developed the **Investor Advisory Portal** for a banking client using **React, Redux Toolkit, Node.js, Express.js, REST APIs, Material UI, and MySQL**, delivering dynamic dashboards, portfolio management features, and secure wealth management interfaces.
- Mentored a team of five developers by conducting code reviews, technical design discussions, sprint planning, daily stand-ups, and collaborating with product owners and stakeholders using **JIRA** and Agile Scrum practices.
- Delivered high-quality features across multiple enterprise projects by following best practices in React architecture, performance optimization, testing, and CI/CD, consistently completing sprint commitments while maintaining excellent client satisfaction.

 **Sonata Software Limited** – Bengaluru, India

## Senior System Analyst

[ 28/01/2019 – 06/09/2021 ]

**Industry: Retail | Contract type: Permanent, Full-time**

- Led full-stack development of **MFL Booking with VH Retail & FGS**, an e-commerce web application using **React, Redux, Node.js, Microservices, HTML5, CSS3, JavaScript, and REST APIs**, enabling real-time vendor inventory checks and purchase order management.
- Designed and developed responsive React-based user interfaces and **Node.js microservices**, increasing wholesale order processing speed by **30%** through workflow optimization, API enhancements, and improved application performance.
- Managed end-to-end client engagement for two major accounts, collaborating with business stakeholders to gather requirements, manage change requests, conduct UAT, and ensure successful feature delivery using Agile methodologies.
- Developed and maintained automated smoke-testing scripts and supported CI/CD deployment processes, reducing post-deployment defects by **20%** while improving application stability and release quality.

 **Cryptograph Technologies Pvt Ltd** – Bengaluru, India

## Senior software developer

[ 12/06/2018 – 25/01/2019 ]

**Industry: Enterprise Technology | Contract type: Permanent, Full-time**

- Developed the **Vendor Inquiry Tool**, a full-stack web application using **CodeIgniter, PHP, MySQL, HTML5, CSS3, JavaScript, and jQuery**, improving vendor data access efficiency by **40%** through a streamlined user interface and optimized database queries.
- Designed and implemented responsive front-end features and back-end modules, enhancing project transparency by **30%** through structured daily reporting templates, dashboard documentation, and improved data management.
- Collaborated with cross-functional teams to develop, maintain, and refactor application components using **CodeIgniter, PHP, MySQL, HTML5, CSS3, JavaScript, and jQuery**, reducing technical debt and improving sprint delivery and code quality.

 **Theorem (India) Private Limited** – Bengaluru, India

## Software Engineer

[ 22/08/2016 – 05/06/2018 ]

**Industry: Digital Marketing | Contract type: Permanent, Full-time**

- Developed the **PayPal APAC Lifecycle Email Builder**, a custom full-stack application using **Laravel, PHP, MySQL, HTML5, CSS3, Bootstrap, JavaScript, and jQuery**, enabling non-technical marketing teams to create, version, and manage HTML email campaigns at scale.
- Built responsive front-end components, back-end services, and **RESTful APIs** for campaign creation, scheduling, reporting, and data management, ensuring scalability, performance, and maintainability.
- Collaborated with **PayPal APAC** stakeholders, business analysts, designers, and QA teams to gather requirements, translate business needs into technical solutions, and deliver features in Agile Scrum two-week sprint cycles.

 **FortuneSoft IT Innovations PVT LTD** – Bengaluru, India

## Software Engineer

[ 12/11/2014 – 30/06/2016 ]

**Industry: Software services | Contract type: Permanent, Full-time**

- Led full-stack development of **Scambook**, a consumer-facing fraud reporting and resolution platform, building and maintaining three independent modules using **CodeIgniter, PHP, MySQL, HTML, CSS, JavaScript, and jQuery**.
- Collaborated with product managers, designers, and QA teams to design, develop, and deploy scalable features, improving fraud reporting workflows and moderation capabilities, contributing to a **25% reduction in fraudulent activity cases**.
- Designed and implemented user-centric features, database enhancements, and community notification functionality using **CodeIgniter, PHP, and MySQL**, resulting in a **30% increase in active fraud report submissions**.

## SKILLS

React.js, Node.js, Bootstrap, HTML, CSS / Redux / Redux-Toolkit / JavaScript / NodeJs (ExpressJs) / TypeScript / Agile project management / Databases : MySQL , MongoDB / Micro-frontends / PHP / Git/Github, Docker, Gitlab / lead others

## LANGUAGE SKILLS

**Mother tongue(s):** Kannada

Other language(s):

## English

**LISTENING** C1 **READING** C1 **WRITING** C1

**SPOKEN PRODUCTION** C1 **SPOKEN INTERACTION** C1

## Lithuanian

**LISTENING** A1 **READING** A1 **WRITING** A1

**SPOKEN PRODUCTION** A1 **SPOKEN INTERACTION** A1

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*
