Other: Saulėtekio al. 11, Vilnius, 10223 Vilniaus m. sav., 560015 Vilnius (Lithuania)

ABOUT ME

Accomplished Principal Engineer with 11+ years of progressive experience in full-stack software development, systems architecture, and engineering team leadership across multinational organisations including Wipro, IBM, Sonata Software, and Theorem Inc. Expert in designing and delivering scalable, high-performance web applications that directly drive business outcomes — with demonstrated achievements of 25–40% operational efficiency improvements across multiple projects.

Currently transitioning to AI Engineering, enrolling in the Master's in Engineering of Artificial Intelligence programme at VILNIUS TECH (VGTU), Lithuania (September 2026). This purposeful career evolution builds on a strong foundation in data management, system optimization, and algorithmic problem-solving to engage deeply with machine learning, intelligent system design, and AI-powered application development.

Core competencies: • Full-Stack Architecture • Cloud DevOps (Docker / Kubernetes / Azure) • Data Pipeline Design • Agile Team Leadership • Client Stakeholder Management • AI-Assisted Development (GitHub Copilot, Cursor)

EDUCATION AND TRAINING

Master of Engineering in Artificial Intelligence

Vilnius Gediminas Technical University (VGTU) [01/09/2026]

City: Vilnius | Country: Lithuania | Level in EQF: EQF level 7

Admitted and commencing studies in September 2026.

Machine Learning, Deep Learning, Generative AI, Computer Vision, Natural Language Processing, Explainable AI, Distributed Systems, Big Data Analytics, IoT, Optimization Algorithms, AI Project Management, Research Methods, and Intelligent System Development.

Bachelor of Engineering in Computer Science

Visvesvaraya Technological University (VTU) [13/06/2009 – 14/06/2013]

City: Karnataka | Country: India | Level in EQF: EQF level 6

Programming (C, C++, Java), Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Computer Architecture, Information Security, Object-Oriented Design, Project Development, Problem Solving and Analytical Skills.

WORK EXPERIENCE

Wipro (Formerly Harman Connected Services Corp. India Pvt. Ltd) – Bengaluru, India

Principal Engineer

[10/10/2024 – Current]

Industry: Consumer Electronics / Healthcare IT | Contract type: Permanent, Full-time

• Lead and manage multi-developer engineering teams to design and deliver robust clinical-data web applications following Agile/Scrum principles

- Architect full-stack solutions using React, Redux Toolkit, Node.js, and MySQL for the BIOS Adam Designer — a clinical trial data management and business-rules engine
- Conduct rigorous code reviews, enforce coding standards, and mentor mid-level and junior developers; responsible for sprint planning, backlog grooming, and stakeholder demos
- Liaise directly with US and European clients to translate business requirements into technical specifications, ensuring zero-defect delivery at sprint cadence
- Improved clinical trial data accuracy by ~35% through innovative data validation layer architecture and automated rule-checking pipelines

 **IBM India Private Limited** – Bengaluru, India

Senior System Analyst

[09/09/2021 – 07/10/2024]

Industry: Cloud Computing / AI / Enterprise Solutions | Contract type: Permanent, Full-time

- Contributed to the Open Balancing Platform — an automated energy supply optimisation system performing real-time demand-supply balancing across energy grids; used React, Node.js, GraphQL, and complex data analytics
- Built and maintained INFRS17 DATA Platform — a real-time streaming and routing solution for insurance data management; designed Kafka-style data streams and routing tables
- Delivered Investor Advisory Portal (banking client) — a full-featured wealth management interface with dynamic dashboards built in React/Redux and backed by RESTful Node.js APIs
- Provided technical mentorship to a team of 5 developers; led requirements workshops, daily standups, sprint reviews; used JIRA and Agile documentation throughout
- Consistently delivered sprint tasks ahead of schedule, maintaining 100% client satisfaction ratings across all three project engagements

 **Sonata Software Limited** – Bengaluru, India

Senior System Analyst

[28/01/2019 – 06/09/2021]

Industry: Digital Transformation / Retail Technology | Contract type: Permanent, Full-time

- Led full-stack development of MFL Booking with VH Retail & FGS — an e-commerce web application for a fashion retail group enabling real-time vendor inventory checks and purchase order management
- Increased wholesale order processing speed by 30% through UI workflow redesign and back-end API optimisation reducing average order cycle time from 12 to 8.4 minutes
- Managed end-to-end client relationship for two major accounts; conducted weekly requirement reviews, change-management documentation, and UAT sign-offs
- Introduced automated smoke-testing scripts that reduced post-deployment defect rate by 20%

 **Cryptography Technologies Pvt Ltd** – Bengaluru, India

Senior software developer

[12/06/2018 – 25/01/2019]

Industry: Enterprise Technology | Contract type: Permanent, Full-time

- Developed Vendor Inquiry Tool — a full-stack front-end and back-end system improving vendor data-access efficiency by 40% through streamlined UI and optimised relational database queries
- Improved project transparency by 30% by introducing structured daily reporting templates and dashboard documentation; adopted across the wider team
- Contributed to sprint velocity improvements through proactive code refactoring, reducing technical debt across the shared code base

 **Theorem (India) Private Limited** – Bengaluru, India

Software Engineer

[22/08/2016 – 05/06/2018]

Industry: Digital Marketing / Healthcare Technology | Contract type: Permanent, Full-time

- Developed the PayPal APAC Lifecycle Email Builder — a custom full-stack application enabling non-technical marketing teams to create, version, and dispatch HTML email campaigns at scale

- Built front-end (jQuery, HTML5, CSS3, Bootstrap) and back-end (PHP/Laravel, MySQL) components; developed REST APIs for campaign scheduling and reporting
- Participated in client workshops with PayPal APAC stakeholders; translated business requirements into technical user stories and delivered within two-week sprint cycles

 **FortuneSoft IT Innovations PVT LTD** – Bengaluru, India

Software Engineer

[12/11/2014 – 30/06/2016]

Industry: Software services | Contract type: Permanent, Full-time

- Led full-stack development of Scambook — a consumer-facing fraud reporting and resolution platform, managing front-end and back-end across 3 independent modules
- Enhanced consumer trust by reducing fraudulent activity cases on the platform by 25% through improved reporting workflows and moderation tooling
- Increased active fraud report submissions by 30% through UX improvements and community notification features

SKILLS

Javascript (React.js) / React Redux / MySQL / node JS / TypeScript / Git/Github, Docker, Gitlab / Agile project management / CSS & HTML / lead a team

LANGUAGE SKILLS

Mother tongue(s): Kannada

Other language(s):

English

LISTENING C1 **READING** C1 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1
